The target butt was built in 1942 at a cost of \$200. The structure is a semi-circle with a concrete foundation, wood floor and wood walls consisting of timber cribbing. The structure is built into a gravel hill. The top of the target butt is 21 feet - 5 inches high. The two timber side walls are each 39 feet long. At the front of the structure the longest distance between the two walls measures 86 feet - 6 inches. In front and apart from the structure is a concrete pad with aircraft tie-downs. The pad measures 55 feet - 6 inches by 55 feet - 6 inches.
